Dear Sir:

In previously filed Information Disclosure Statements, Applicants identified certain related patents and pending non-provisional patent applications owned or co-owned by Geron Corporation with claims related to cardiomyocytes derived from human embryonic stem cells. For the convenience of the Office, in this supplemental IDS, Applicants provide an updated list of related patents and applications including additional patents and applications. The tables below show the status of pending applications.

A copy of the non-patent document cited in the attached SB/08 is included in this filing.

It is understood that the Office has access to the full patent specifications, file histories, and other information via PAIR. However, should the Office require copies of any specifications or file histories the Office is urged to contact the undersigned. Moreover, although Applicant provides this information in an attempt to assist the Office, it is Applicants' understanding that the Examiner will conduct his/her own analysis.
